# 7.1.3 : Alternate energy initiatives

#### 7.1.3. Alternate Energy initiatives

It is the need of hour to reduce the burden on the planet earth for energy requirements which generated from the conventional energy methods. The conventional energy generation methods are polluting the environment and depleting the natural resources, which are already scarce, at a faster rate than before. Now it is in the best interest of humanity to search and tap alternative energy resources which are green and efficient. Institute is very sensitive to energy issues and responded to it positively. Institute has installed Solar Panel as an alternate energy initiative in the academic year 2017-2018. The daily generation report is attached as a proof. The total power consumption is calculated based on the attached monthly bill.
